## CAME ENTROTEC ePRO VIDEO DOOR ENTRY AND ACCESS CONTROL

### OVERVIEW

The ePRO video door entry and access control system offers extensive functionality to provide an expandable true IP system. ePRO is flexible and customisable with many unique features making it a security solution suitable for a wide range of applications, including private housing and commercial buildings.

The video intercom with real time video surveillance and video capture simplifies selective communication between visitors, residents, security staff and Concierge. Advanced connectivity and smart device integration allow you to see, hear and speak to

visitors using the CAME Entrotec Connect App (iOS and Android).

Integrated high security access control streamlines the entrance experience for residents and staff. Security encryption prevents unauthorised cloning and protects people and their properties.

Easy to use system management tools allow the system owner to manage the Door Entry, Access Control and Video Management System (VMS) to enable complete oversight of the security of the building from an intuitive user interface.

### Door Panel

Robust and refined Stainless-Steel ePRO Door Panel provides a simple and easy to use entry experience for visitors. Residents simply present their dedicated fob to the High Security Reader for authorised access.

**High security fob for use with integrated access control**

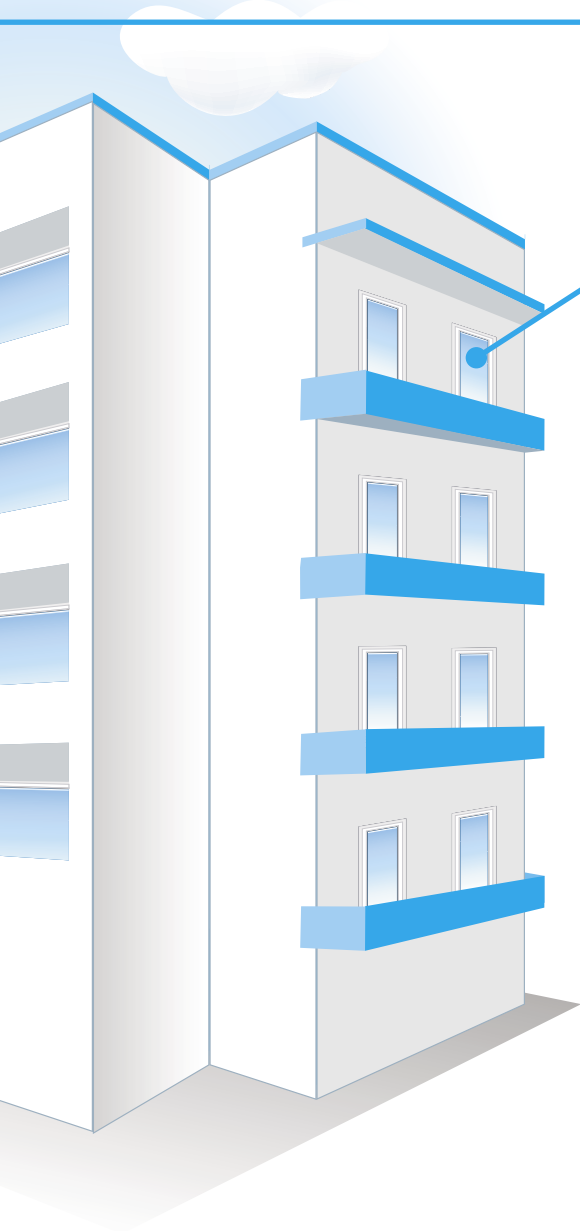

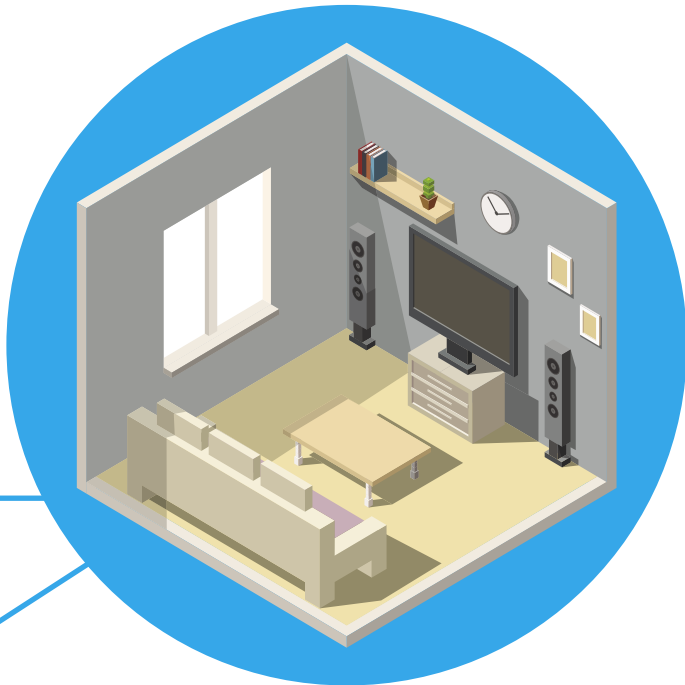

IP is a set of protocols that devices use to communicate on a network. Increasingly this term is being used very loosely to describe proprietary hybrid devices. Such devices may not be using protocols required to co-exist on a true IP network. Only True IP devices like CAME Entrotec's ePRO can be integrated on network capable of expansion, resulting in a solution that is quick and easy to install and provides a future-proof investment.

## ePRO HOME

Our deluxe touchscreen monitors allow you to accept or decline communication with a visitor.

The option to record video or capture an image of the visitor along with free audio calls to other residents are added security features. Residents can also review and manage general messages sent for their attention.

## CAME Entrotec Connect App

On systems with a dedicated Internet connection, the resident can receive calls from visitors with the CAME Entrotec Connect App. The option to open the door or decline the call is available. Enhances accessibility and convenience allowing you to answer the door from anywhere.
