

# eTAG-RF 4CH

4 Channel, AM Remote Access Control Solution

## Overview

Typical applications for this product include: triggering automatic gates, automatic doors, car park barriers, etc.

The RF keyfobs are securely added or deleted at the call panel, there is no need to access the receiver unit. Keyfobs can also be administered remotely over a network, with the ability to delete and replace lost keyfobs.

Installation is simple and flexible with only four connections to the APEX door bus; and doesn't require 'line of sight', the system will operate around corners and walls.

## Technical characteristics

| Item               | ETAG RF KEYFOB 4CH |
|--------------------|--------------------|
| Channels / Buttons | 4                  |
| Frequency          | 443.92MHz (AM)     |
| Battery Type       | CR2032             |
| Compliance         | CE, RoHS           |
| Dimensions         | 32.7 x 59.2 x 8mm  |
| Weight             | 16g                |
| Ingress Protection | IP68               |

  

| Item               | ETAG RF RECEIVER 4CH |
|--------------------|----------------------|
| Channels / Buttons | 1                    |
| Frequency          | 443.92MHz (AM)       |
| Power              | 13.8VDC, 2A          |
| Compliance         | CE, RoHS             |
| Dimensions         | ~ 110 x 192 x 40mm   |
| Weight             | 220g                 |
| Ingress Protection | IP68                 |
