

# STAINLESS STEEL COLLAR

Surround for Type 17 and Type 23 entry panels

## Stainless Steel Collar Overview

CAME Entrotec's stainless steel collar is designed to cover the existing cut-out / hole from a previous, larger panel. As such it comes in any size, as specified by the customer, and has a standard inner cut out to accommodate the Type 17 or Type 23 panels.

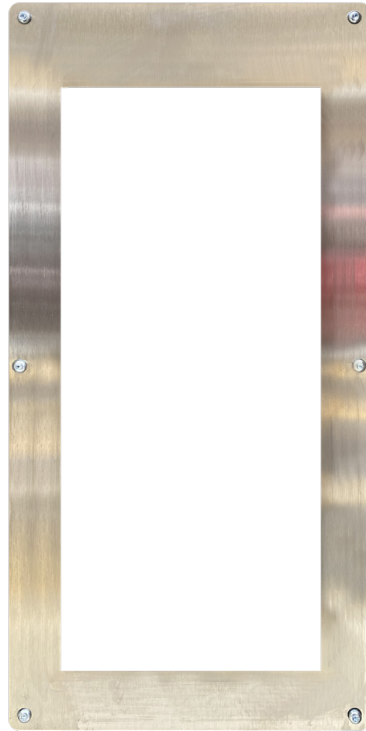

- Marine grade stainless steel 316L construction
- Fixing holes provided

### IMPORTANT

Due to the custom nature of this item, measurements **must be taken and provided by the customer**. Please check your quotation for the call panel type that you have been quoted. The outside dimension of the collar should completely cover the pre-existing hole. Please ensure you provide the correct outside dimensions when ordering. CAME Entrotec accepts no responsibility for collars manufactured to incorrectly supplied outer dimensions. We would be happy to provide any assistance required.
