## Installation Specification

It is the responsibility of the installer to follow Entrotec's installation and cable specification as well as ALL relevant wiring regulations. Failure to comply with Entrotec's installation and cable specification may result in erratic operation of equipment and could invalidate any warranty.

Installations must comply with BS 7671: Requirements for electrical installations. IET Wiring Regulations 17th Edition.

IET Wiring Regulations 17th Edition: Regulation 528-01 (Proximity to electrical services) imposes requirements for segregation of door entry / access control circuits (Band I), 230VAC mains circuits (Band II) and other higher voltage circuits.

IET Wiring Regulations 17th Edition: Regulations 542 to 543 impose requirements for earthing and bonding conductors. Ensure ALL metalwork is bonded to the buildings earth, this includes cameras, cabinets and metal conduit. Ring terminals and earth points are provided on cabinets to terminate earth cables, ensure these connections are made.

## Warranty and Support

Entrotec systems are renowned for their reliability and have a 2 year warranty on all Entrotec manufactured products as standard. This warranty does not cover water damage, vandalism, mains electrical faults, lightning strikes, damage caused by miswiring or cable faults.

Entrotec offer complimentary training courses and telephone support:

**01506 886 235** - 8:30am to 5pm Mon-Thurs and 8:30am to 4pm Friday.

# 1 Important Information

## 1.1 Electrical Safety

Always follow Entrotec's installation and cable specification as well as ALL relevant wiring regulations. The power source for this product must conform to the requirements of SELV (Safety Extra Low Voltage).

### **WARNING**

Switch off PSU before making connections.

### **TEST VOLTAGE**

Check the voltage to verify the power supply meets the requirements of working voltage of the camera before operating the device (the cable length of the power supply cable will affect voltage).

## 1.2 Environment

- Do not aim the device at strong light (such as lighting, sunlight, etc).
- Transport, use and store the device within the range of allowed humidity and temperature.
- Prevent water and other liquid falling into the camera to prevent damage.
- Install the device in a location with good ventilation in case of heat accumulation.
- Avoid heavy stress, violent vibration or water splash during transportation, storage and installation.
- Keep the device within the standard factory packaging when transporting the device.

## 2 Cable Specification

The cabling system is based on RG59 Coax and Unshielded Twisted Pair (UTP) that meets or exceeds the construction and transmission performance requirements of **CW1308** (BT Spec), **Cat5e** or **Cat6**. The cable must be **annealed pure copper** with a **conductor diameter  $\geq 0.485\text{mm}$** .

Failure to comply with this cable specification may result in erratic operation of equipment.

The specification below shows the minimum cable requirements, allow for extra cabling if redundancy is required.

Connection	Cable
<b>Door entry controller to camera:</b>	1 x RG59 coax (75 Ohm).
<b>DVR to camera:</b>	1 x RG59 coax (75 Ohm).
<b>Supply cable from PSU:</b>	UTP cable, conductor diameter $\geq 0.485\text{mm}$ , 2 cores.

**DO NOT USE CCA** (Copper Clad Aluminium), **CCS** (Copper Clad Steel) or **CCAM** (Copper Clad Magnesium).

These cables are far less conductive than a pure copper cable and will cause erratic operation.

### TEST FOR PURE COPPER CABLE

The typical DC resistance of each core of UTP cable is  $\leq 10 \text{ Ohms}/100\text{M}$ .

## 3 Overview

FIGURE 1

This 1080P full HD camera supports multiple video formats including HDCVI (HD), CVBS (SD) and other two common HD analog formats. The HD formats can be switched over through OSD menu.

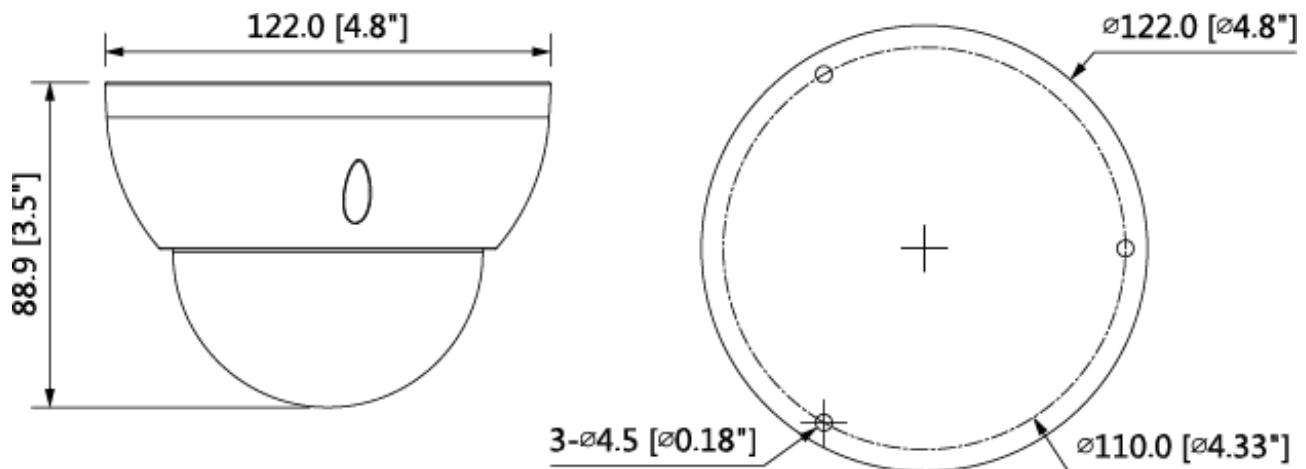

FIGURE 2 - DIMENSIONS IN MM

## 4 Device Installation

This dome camera is typically ceiling or wall mounted and is suitable for internal or external use.

### ATTENTION

- Avoid leaving the camera disassembled in a damp environment.
- Ensure the installation surface sufficient to sustain at least three time the camera weight.
- Align the installation template in accordance the side or top outlet.
- Avoid removing the protective electrostatic adsorption film on the surface of transparent cover before installation debugging is completed.

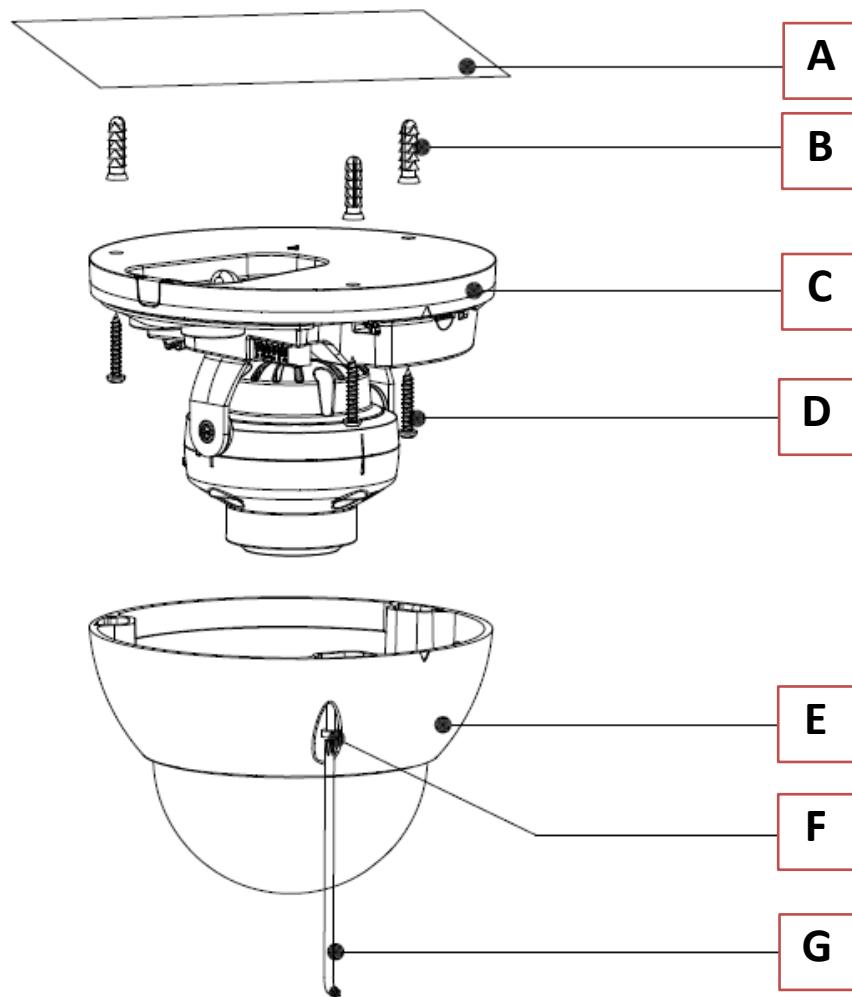

FIGURE 3

#### 4.1 Step 1

Position and affix the installation template to the ceiling or wall **A** (according to the desired cable outlet).

Drill holes on the installation surface according to the installation template.

Install the wall plugs **B**

#### 4.2 Step 2

Use inner hex wrench **G** to loosen three locking screws **F** to remove the enclosure **E**.

#### 4.3 Step 3

Adjust the location of the dome pedestal **C** according to the cable outlet. If using the side outlet, pull the cable out through the side outlet of installation surface and pedestal.

Align the screw fixing holes of dome pedestal to the fixing holes of wall plugs on the installation surface, then insert the self-tapping screws **D** into the wall plugs and secure them firmly.

Fix the dome on the installation surface.

## 5 Connections

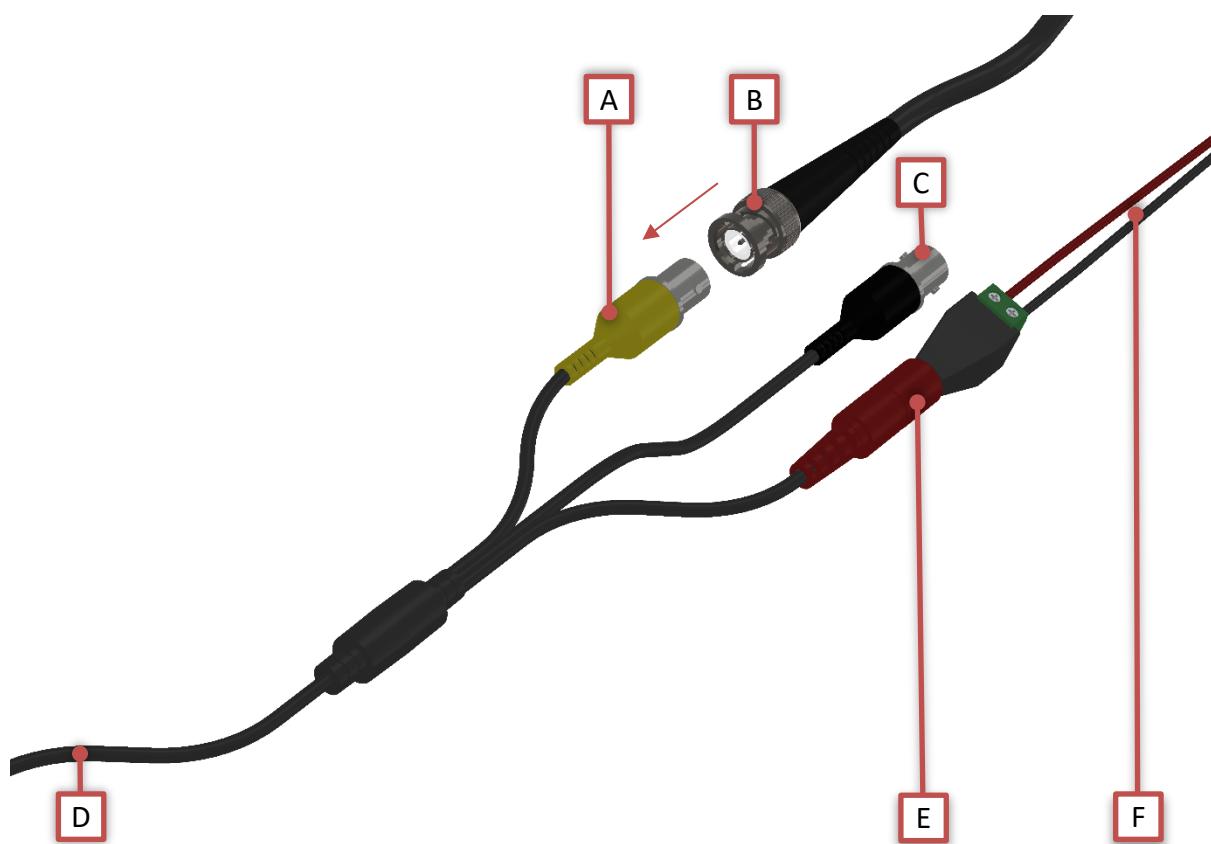

FIGURE 4

A	BNC Video Output (CVBS) - Yellow
B	BNC (Male) - RG59 Coax Cable to Video Switch or Controller
C	BNC HD Video Output (HDCVI) - to Compatible DVR - Black
D	Connection from Camera
E	12VDC Input to Camera
F	Connection from Power Supply or Power Distribution Terminal Block

## 6 Settings

This HDCVI camera series can be adjusted via coaxial control using a compatible test monitor, HCVR or compatible controller.

### 6.1 HDCVR OSD

**Main Menu > Setting > System > PTZ** select the channel number for access and set control mode as HDCVI and the protocol as HD-CVI. Click **Save** button to save current setup.

FIGURE 5

## 6.2 Menu Operation

Click the right mouse button and select **PTZ Control**, then you will see the **PTZ Setup** menu, which is as shown in Figure 6 and Figure 7.

FIGURE 6

FIGURE 7

Button	Function	
+	Open menu	
	Select menu item	
	Select menu value	
Zoom	Adjust lens zoom and auto trigger focus	<b>Note:</b> Some of the buttons can only be applied for the motorized varifocal camera.
Focus	Adjust lens focus	
Iris	Auto focus under current zoom rate	
	Lens reset	

FIGURE 8

If there is , click the **Confirm** button in **Menu Operation** interface to go to the 2nd menu. Click **Return** button to go back to the previous menu interface.
